

Switch to Quality!

MERZ Schaltgeräte GMBH + CO KG Product Longevity Program

The Goal of MERZ Schaltgeräte GMBH + CO KG Product Longevity Program is to ensure a stable Supply of Products for your Machinery and Equipment.

Participating Products are available for a minimum of 10 Years. Designated participating Products developed for specific Business Segments are available for a minimum of 15 Years. The Product longevity indicated for a particular Product is the minimum period MERZ will make the Product available. Extended periods are available under certain Circumstances. In dependent of that MERZ is trying to provide a Form, Fit and Function Replacement whenever possible and as long as the Product Standard will allow it.

Product Availability is measured from MERZ Launch Date of the participating Product. To maintain the Longevity:

MERZ may transfer participating Products to another Manufacturing Facility. In this Case, MERZ will requalify the participating Product in the new Facility.

MERZ may require Customers to migrate to a Product that is Form, Fit and Function compatible with the participating Product.

MERZ may make Modifications to maintain Security Features, mitigate Vulnerabilities, or both.

Production of participating Products will not automatically be discontinued upon Expiration of the Longevity Period and all applicable MERZ End of Life and Product Change Notification Policies continue to apply.

The participating Products, the Longevity Period, or both are subject to change due to Circumstances beyond MERZ reasonable Control
